

New Exports for Services Surveys

20 November 2018

We are delighted to announce that the trade picture captured by the PMI surveys widens next month with the inclusion of new service sector export orders data. These new data series, available for all countries covered by the services PMI surveys, will complement the existing manufacturing export data to provide a more comprehensive mapping of national, regional and global trade. Data has been collected since September 2014.

Please do not hesitate to contact economicshs@ihsmarkit.com if you have any questions.
