## Markit Europe Sector PMI™

### Industrials and financials drive European growth in March

#### Key points:

- Industrials expansion at six-year high
- Growth in financials fastest since mid-2007
- Consumer services activity stagnates

The latest Europe Sector *PMI*® data from IHS Markit indicated that the broad **industrials** and **financials** sectors performed strongly in March, while **consumer services** stagnated. Over the first three months of 2017 as a whole, **technology** recorded the sharpest expansion.

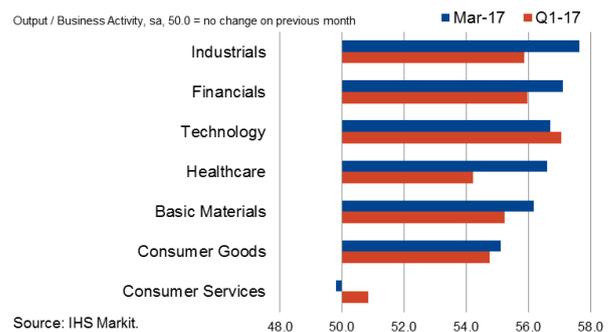

Industrials – comprising sectors as diverse as business services, machinery, construction and transportation – registered the strongest output growth in just over six years in March. Within the sector, the sharpest growth rates were seen in **commercial & professional services**, **general industrials** and **machinery & equipment**.

Meanwhile, business activity in the European **financials** sector – including banks, real estate, insurance and other financials – increased at the fastest rate since July 2007, led by **other financials** and **banks**.

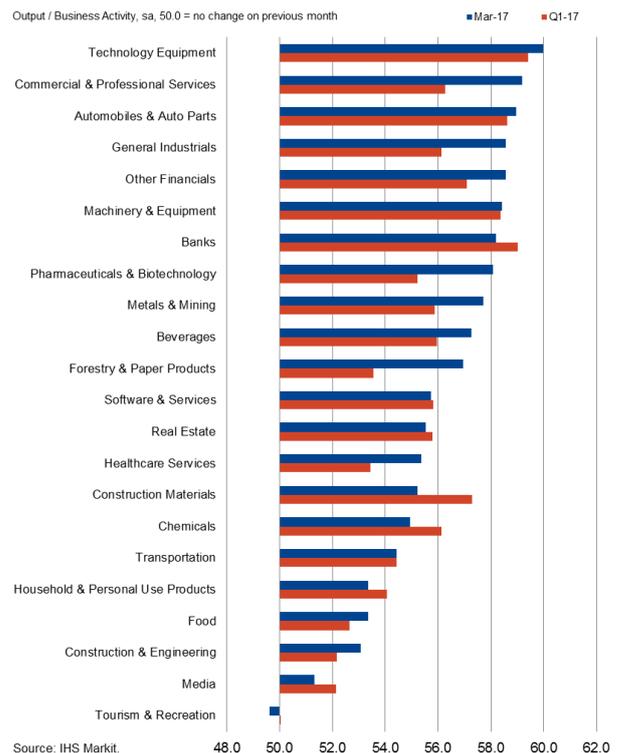

**Consumer services** registered the first drop in activity since July 2013, albeit fractional. Its two constituent sectors – **tourism & recreation** and **media** – were the bottom-ranked detailed categories.

Other notable performers at the detailed level in March were **technology equipment** – in first place overall – and **automobiles & auto parts**, ranked third.

**Notes to Editors:**

“PMI” is an acronym for *Purchasing Managers’ Index*, a type of survey originally developed for tracking business conditions in the manufacturing sector. Markit now uses ‘PMI’ to describe the methodology used for surveys also undertaken in the services, construction and non-oil private sectors.

Markit Europe Sector PMI data are derived from surveys of around 6,500 companies operating in 11 countries, including Austria, Czech Republic, France, Germany, Greece, Ireland, Italy, Netherlands, Poland, Spain and the United Kingdom. The data are typically released on the fifth working day of each month, two days’ after the Global Composite PMI, at 0930 UK time.

The Europe Sector PMI data provide corporate planners and decision makers, economic analysts, policy makers and investors with a powerful and unique database with which to monitor business cycles by industry. Sector trends over time can be tracked as well as relative performance between sectors, allowing identification of key growth industries and the drivers within them.

The dataset provides monthly indicators of business trends across variables such as output, order books, prices, inventories and employment for seven major groups including: basic materials, consumer goods, consumer services, financials, healthcare, industrials, and technology; and a further 26 sectors and subsectors of those groups.

Sector PMI data are generated from the same questionnaire responses as national PMI data, and mapped to Markit’s sector classification structure using Standard Industry Classification (SIC) codes. Respondents are asked to state whether business conditions for a number of variables have improved, deteriorated or stayed the same compared with the previous month. Diffusion indexes are calculated for each variable (the percentage of positive responses plus half the percentage of neutral responses). These indexes vary between 0 and 100 with levels of 50.0 signalling no change on the previous month. Readings above 50.0 signal an improvement or increase on the previous month. Readings below 50.0 signal a deterioration or decrease on the previous month. The greater the divergence from 50.0 the greater the rate of change signalled.

Individual company responses will be weighted on the basis of that company’s country of origin. Country weights for each sector are derived from a combination of GDP data and detailed industry gross value added.

The PMI diffusion indexes are then adjusted for seasonality using the X-12 ARIMA program.

Detailed historical European sector data are available via a subscription from Markit, and datasets are also available for the US, Asia and at a global level. For further information please contact [economics@ihsmarkit.com](mailto:economics@ihsmarkit.com).

**About IHS Markit ([www.ihsmarkit.com](http://www.ihsmarkit.com))**

IHS Markit (Nasdaq: INFO) is a world leader in critical information, analytics and expertise to forge solutions for the major industries and markets that drive economies worldwide. The company delivers next-generation information, analytics and solutions to customers in business, finance and government, improving their operational efficiency and providing deep insights that lead to well-informed, confident decisions. IHS Markit has more than 50,000 key business and government customers, including 85 percent of the Fortune Global 500 and the world’s leading financial institutions. Headquartered in London, IHS Markit is committed to sustainable, profitable growth.
