

Istanbul Chamber of Industry Istanbul PMI® Manufacturing Index

Istanbul Manufacturing PMI at 54.2 in August

August 2017 Key findings:

- PMI at highest level since January 2014
- Strong expansions in output and new orders
- New export business increases at fastest rate since December 2010

Summary

The Istanbul Manufacturing PMI® signalled an impressive performance from the city's manufacturing sector in August. Output and new orders both increased at the fastest rates since January 2014, and new export business growth was the strongest since December 2010. This generated an expansion in backlogs of work in the sector, and faster employment growth.

The headline Istanbul Chamber of Industry Istanbul Manufacturing PMI is a composite single-figure indicator of manufacturing performance. It is derived from indicators for new orders, output, employment, suppliers' delivery times and stocks of purchases. Any figure greater than 50.0 indicates overall improvement of the sector.

The PMI registered 54.2 in August, up from 52.3 in July. This signalled the strongest overall improvement in business conditions at manufacturers since January 2014. The headline figure was well above its long-run average (since January 2006) of 50.5.

Four of the five PMI components provided positive contributions to the headline figure in August, the exception being stocks of purchases. The uptick in the PMI figure since July reflected faster increases in output, new orders and employment as well as a greater lengthening of suppliers' delivery times.

New order growth accelerated since July and was the fastest since January 2014. Notably, the volume of new business from international markets increased at the strongest pace since December 2010.

Istanbul Chamber of Industry Istanbul PMI® Manufacturing Index

Output rose for the sixth successive month in August, the longest sequence of continuous expansion in over three years. Furthermore, the rate of growth was the sharpest since January 2014.

Similarly, purchasing activity among manufacturers in Istanbul increased for the fifth month running in August and at the strongest rate since February 2014. This placed further pressure on suppliers, whose delivery times lengthened for the eighth consecutive month and to the greatest extent since October 2013.

Input prices paid by manufacturers continued to rise in August. The rate of inflation increased to a three-month high, but was still below the long-run series average. Output prices charged by manufacturers also increased at the strongest rate since May.

Comment

Commenting on the Istanbul Chamber of Industry Istanbul Manufacturing PMI survey data, Trevor Balchin, Director, Economics at IHS Markit, said:

“The PMI for Istanbul rose for the sixth time in seven months in August, reaching its highest since the start of 2014. This reflected stronger gains in output, new orders and jobs. Signs of capacity pressures were evident as suppliers’ delivery times lengthened, backlogs rose and input price inflation accelerated.”

Istanbul Chamber of Industry Istanbul PMI[®] Manufacturing Index

Output Index

Q. Please compare your production/output this month with the situation one month ago.

Manufacturing production in Istanbul rose for the sixth successive month in August, reflecting higher new orders. The rate of expansion strengthened during the month to the fastest since January 2014.

New Orders Index

Q. Please compare your new orders received (in units) this month with the situation one month ago.

The volume of new work received by manufacturers based in Istanbul increased for the fifth month running in August. The rate of expansion accelerated to a 43-month record.

Istanbul Chamber of Industry Istanbul PMI® Manufacturing Index

Istanbul Chamber Of Industry

Driving strength from her members' contributions to Turkish economy and since her foundation in 1952, Istanbul Chamber of Industry (ICI) stands out as Turkey's largest chamber of industry and one of the most powerful representatives of Turkish industry. The added value generated by ICI members represents about 36% of the total added value propagated by Turkish industry. ICI members actualize approximately 34% of production of Turkish industry. Almost 40% of Turkey's Top 500 Industrial Enterprises consists of ICI members.

ICI promotes the sustainable development of Turkish industry and contributes the improvement of her competitiveness via offering innovative services to her members. For this purpose, she develops new projects and services to the use of industrialists in crucial fields such as; innovation, technology development, university-industry cooperation, vocational training, international relations, environment and energy with local and international partnerships.

Generating and conducting economic researches together with gathering data, ICI holds the widest knowledge on Istanbul industry whilst giving direction to Turkish industrialists and providing intense contribution for shaping economic and industrial policies.

About IHS Markit:

IHS Markit (Nasdaq: INFO) is a world leader in critical information, analytics and expertise to forge solutions for the major industries and markets that drive economies worldwide. The company delivers next-generation information, analytics and solutions to customers in business, finance and government, improving their operational efficiency and providing deep insights that lead to well-informed, confident decisions. IHS Markit has more than 50,000 key business and government customers, including 85 percent of the Fortune Global 500 and the world's leading financial institutions. Headquartered in London, IHS Markit is committed to sustainable, profitable growth.

About PMI:

Purchasing Managers' Index™ (PMI®) surveys are now available for over 30 countries and also for key regions including the eurozone. They are the most closely-watched business surveys in the world, favoured by central banks, financial markets and business decision makers for their ability to provide up-to-date, accurate and often unique monthly indicators of economic trends. To learn more go to www.markit.com/product/pmi.

Notes to Editors:

The Istanbul Chamber Of Industry Istanbul Manufacturing PMI® (Purchasing Managers' Index™) is produced by IHS Markit. The report features original survey data collected from a representative panel of around 300 companies based in Istanbul's manufacturing sector. The panel is stratified by Standard Industrial Classification (SIC) group, based on the industry contribution to GDP.

Survey responses reflect the change, if any, in the current month compared to the previous month based on data collected mid-month. For each of the indicators the 'Report' shows the percentage reporting each response, the net difference between the number of higher/better responses and lower/worse responses, and the 'diffusion' index. This index is the sum of the positive responses plus a half of those responding 'the same'.

Diffusion indexes have the properties of leading indicators and are convenient summary measures showing the prevailing direction of change. An index reading above 50 indicates an overall increase in that variable, below 50 an overall decrease.

IHS Markit do not revise underlying survey data after first publication, but seasonal adjustment factors may be revised from time to time as appropriate which will affect the seasonally adjusted data series. Historical data relating to the underlying (unadjusted) numbers, first published seasonally adjusted series and subsequently revised data are available to subscribers from IHS Markit. Please contact economics@ihsmarkit.com.

The Manufacturing Purchasing Managers' Index (PMI) is a composite index based on five of the individual indexes with the following weights: New Orders - 0.3, Output - 0.25, Employment - 0.2, Suppliers' Delivery Times - 0.15, Stock of Items Purchased - 0.1, with the Delivery Times Index inverted so that it moves in a comparable direction.

The Purchasing Managers' Index (PMI) survey methodology has developed an outstanding reputation for providing the most up-to-date possible indication of what is really happening in the private sector economy by tracking variables such as sales, employment, inventories and prices. The indices are widely used by businesses, governments and economic analysts in financial institutions to help better understand business conditions and guide corporate and investment strategy. In particular, central banks in many countries (including the European Central Bank) use the data to help make interest rate decisions. PMI surveys are the first indicators of economic conditions published each month and are therefore available well ahead of comparable data produced by government bodies.
