# J.P.Morgan Global Manufacturing PMI™

Produced by J.P.Morgan and IHS Markit in association with ISM and IFPSM

## Global Manufacturing PMI edges higher in April

The start of the second quarter saw a mild improvement in the rate of expansion of the global manufacturing sector. Growth of production and new orders both ticked higher, supporting further solid and steady job creation. However, the upturn remained subdued compared to the start of the year, in part reflecting a recent slowdown in growth of new export orders.

The J.P.Morgan Global Manufacturing PMI™ – a composite index<sup>1</sup> produced by J.P.Morgan and IHS Markit in association with ISM and IFPSM – posted 53.5 in April, up from March’s six-month low of 53.3. The headline PMI has signalled expansion in each of the past 26 months.

*Please note that due to later than usual release dates the PMI data for Russia and Myanmar manufacturing were not available for inclusion in the April 2018 global PMI numbers.*

April data indicated that developed nations (on average) continued to outperform emerging markets. The US saw growth improve to a three-and-a-half year high. The rate of expansion also remained solid in the euro area, despite the PMI falling to a 13-month low and staying well below December 2017’s record high. Growth accelerated in Japan and Australia, but slowed in the UK.

Among the largest emerging nations, China, India and Brazil all registered an improvement in operating performance during April. Rates of expansion strengthened slightly in China and India, but slowed to a three-month low in Brazil.

The rate of expansion in global manufacturing production improved slightly in April. However, the upturn in output remained subdued, as growth of new orders stayed modest and international trade flows eased closer to stagnation. There were also signs that capacity pressures may be constraining the expansion of the manufacturing sector, as backlogs of work increased and suppliers’ delivery times (an indicator of stress on supply-chain capacity) lengthened.

Pressure on vendors resulting from demand for some raw materials exceeding supply also contributed to a further marked increase in purchase prices in April. Input costs rose at a marginally quicker pace, leading to a slightly sharper increase in average selling prices.

Manufacturing employment rose for the twentieth successive month in April, with the rate of jobs growth matching that of March. Staffing levels were raised in almost all of the nations covered, the exceptions being reductions in China, South Korea, Turkey and Thailand and no change in Indonesia.

### Commenting on the survey, David Hensley, Director of Global Economic Coordination at J.P.Morgan, said:

“April PMI data signaled a marginal pick-up in the rate of expansion of the global manufacturing sector, the first growth acceleration seen since the turn of the year. Forward-looking orders data point to solid output gains in coming months, constrained by a cooling in the inventory cycle.”

### Global Manufacturing PMI™ Summary

50 = no change on prior month.

Index	Mar.	Apr.	+/-	Summary
Global PMI	53.3	53.5	+	Rising, faster rate
Output	53.4	53.9	+	Rising, faster rate
New Orders	53.7	53.9	+	Rising, faster rate
New Exports	51.8	50.9	-	Rising, slower rate
Employment	52.3	52.3	=	Rising, unchanged rate
Input Prices	59.9	60.1	+	Rising, faster rate
Output Prices	53.8	54.0	+	Rising, faster rate
Future Output	65.0	64.2	-	Positive, lesser extent

## Notes to Editors:

The Global Report on Manufacturing is compiled by IHS Markit based on the results of surveys covering over 12,000 purchasing executives in over 40 countries. Together these countries account for an estimated 95% of global manufacturing output<sup>2</sup>. Questions are asked about real events and are not opinion based. Data are presented in the form of diffusion indices, where an index reading above 50.0 indicates an increase in the variable since the previous month and below 50.0 a decrease.

<sup>1</sup> Data from the IHS Markit survey of US manufacturing are included in the global manufacturing PMI composition from February 2010 onwards. Data prior to that date are based on the ISM US manufacturing survey.

<sup>2</sup> Source: World Bank World Development Indicators (2015 data, constant US\$ measure).

<sup>3</sup> For these nations, manufacturing sector responses are extracted from whole economy PMI surveys for inclusion in the Global Manufacturing PMI

## Methodology: Global Manufacturing PMI™ Indices

The Global Manufacturing PMI™ indices are all seasonally adjusted. The seasonal adjustment is applied at the national level (as opposed to at the global aggregate level) in order to account for differing seasonal patterns in each of the nations included. Global Manufacturing PMI™ indices are weighted according to national contributions to global manufacturing gross value added. Weights for the global indices are derived from the latest available World Bank data on the gross value added of manufacturing for each of the nations covered. World Bank data on value added are in constant 2010 US\$, with all national currencies converted to 2010 US\$ by the World Bank using DEC alternative conversion factors.

# J.P.Morgan

### JPMorgan Chase & Co.

JPMorgan Chase & Co. (NYSE: JPM) is a leading global financial services firm with assets of \$2.3 trillion and operations in more than 60 countries. The firm is a leader in investment banking, financial services for consumers, small business and commercial banking, financial transaction processing, asset management and private equity. A component of the Dow Jones Industrial Average, JPMorgan Chase & Co. serves millions of consumers in the United States and many of the world's most prominent corporate, institutional and government clients under its J.P. Morgan and Chase brands. Information about JPMorgan Chase & Co. is available at [www.jpmorganchase.com](http://www.jpmorganchase.com).

### IHS Markit

IHS Markit (Nasdaq: INFO) is a world leader in critical information, analytics and expertise to forge solutions for the major industries and markets that drive economies worldwide. The company delivers next-generation information, analytics and solutions to customers in business, finance and government, improving their operational efficiency and providing deep insights that lead to well-informed, confident decisions. IHS Markit has more than 50,000 key business and government customers, including 85 percent of the Fortune Global 500 and the world's leading financial institutions. Headquartered in London, IHS Markit is committed to sustainable, profitable growth. IHS Markit is a registered trademark of IHS Markit Ltd. All other company and product names may be trademarks of their respective owners © 2018 IHS Markit Ltd. All rights reserved.

### Institute for Supply Management™ (ISM)

Founded in 1915, the Institute for Supply Management™ (ISM) is the largest supply management association in the world as well as one of the most respected. ISM's mission is to lead the supply management profession through its standards of excellence, research, promotional activities, and education. ISM's membership base includes more than 40,000 supply management professionals with a network of domestic and international affiliated associations. ISM is a not-for-profit association that provides opportunities for the promotion of the profession and the expansion of professional skills and knowledge. [www.ism.ws](http://www.ism.ws)

### International Federation of Purchasing and Supply Management (IFPSM)

The International Federation of Purchasing and Supply Management (IFPSM) is the union of 48 national purchasing associations worldwide. Within this circle, about 250,000 purchasing professionals can be reached. IFPSM is a non-political, independent and non-profit oriented international organisation, registered in Aarau, Switzerland. IFPSM facilitates the development and distribution of knowledge to elevate and advance the procurement profession, thus favourably impacting the standard of living of citizens worldwide through improved business practices.
